number of 3 Po-2s at Dresden-Klotzsche airfield, it is assumed that the aircraft are liaison or courier planes of the headquarters of the lat Gds Mecz Army. The per-

		25X1A
		thining air force personnel are cuartered in the former Hansa building in the
		southern section of the field.
25X1A	20	Comment. The radar set, probably a Dumbo-type set, is located on the nor-
		thern edge of the field. It is probably not connected with the livison squad-
		ron but possibly carries out air space control missions.
25X1A	3.	Comment. Since 3 November 1953, the former Hansa building has housed a
		recruit unit of the Soviet Army besides the soldiers of a higison squadron: the
	2000	recruit unit probably belongs to the 11th Gds Tank Div most of whose personnel
		are stationed in Dresden-Klotusche. 25X1A
25X1A	40	Comment. According to available information, the former Luftkriegeschule in
•	•	Residen-Klotzsche has housed the following units:
		a. An MVD unit with personnel wearing black-bordered red enaulets;
		b. A motor vehicle driving school of the Twenty-Fourth Air Army:
		distribution of motor vehicles.
